

## Striplite™

2 ft and 4 ft

The Striplite™ Series is a slim, compact design strip fixture for led tubes, that provides general illumination in residential and light commercial applications. A fully integrated fixture solution that balances performance and economics.

Developed in a low-profile housing, Striplite™ Series incorporates (optional) our latest generation of led tubes GEN 2 Series. The body is made of steel, 0.25mm thickness after painting. Multistage iron phosphate pretreatment ensures bonding and basic rust inhibitor. Commercial grade lamp holders (sockets) T8, allows a firm and secure connection with led tubes. Single end or 2 end power wiring available.

The Striplite™ Series offers multiple options and combinations to accommodate to your needs, you may order with or without led tubes, “contractor choice” shrink wrap packing, or color pack for retailer operations. When you use Americanlite® LED tubes, you upgrade your choice, because you make sure you are getting Long-Life LED tubes with state of the art industrial grade technology, to deliver optimal lighting performance.

The Striplite™ Series is the perfect solution for residential, commercial, and some retail applications; can be used in storage/utility areas, shops, task and general area lighting.
